

TFB's CTI Server and Media Server are based on standard PC platforms designed to function in typical office, IT, or phone switch environments. This specification outlines temperature, humidity, and power requirements for Servers supplied by TFB.

Requirements	
ENVIRONMENT	
Temperature	Operating 50°-100°F (10-40 C)
Temperature (storage)	35°F to 115°F
Humidity (operating)	20%-80% non-condensing
Humidity (non-operating)	5% to 90% non-condensing
Heat Dissipation	1600 BTU/Hr (maximum)
POWER	
Nominal Line Voltage	100 to 120 VAC
Range Input Line	90 to 132 VAC
Frequency Range	50 to 60 Hz
Input Power	400 Watts
Input Current	4.7A at 120 VAC

For help with pre-configuration issues, or assembling a CTI Server compatible PC, please contact your assigned TFB project manager, or call TFB's toll free technical support line at 877-612-4832.
